## DETAILED ACTION

### *Specification*

The amendment filed 9/06/02 is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: The amendment to page 10, line 7, where substantially is substituted for "almost". The terms are not equivalents.

Applicant is required to cancel the new matter in the reply to this Office Action.

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3 and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Foy in view of Friedrich (US 4,062,467). Regarding claim 3, Foy does not teach the lower engagement portion on the sidewalls. Friedrich as seen in Fig. 1, teaches a folding container where the walls fold inwardly and there are connection elements on the walls for holding the walls in an erected position. It would have been obvious to employ the connection elements of Friedrich in the container of Foy to provide and alternative way to hold the walls. Some of the engagement section in the modified container of Foy is in the bottom portion. Regarding claim 4, see Foy, Fig. 4, 90 is

Art Unit: 3727

disclosed as a stop member for the walls. In order to perform as a stop there will be contact. See Fig. 9. where there is no space between 54 and 28. This is an internal view of 90.

Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Foy in view of Friedrich as applied to claim 3 above, and further in view of Uitz. Regarding claim 5, the modified container of Foy does not teach the cardholder being in a thin section. Uitz, as seen in Figs. 6 and 7, teaches a folding container similar to Foy where there is a cardholder in a sidewall in thin section. It would have been obvious to employ the cardholder of Uitz in the modified container of Foy to provide a simple way to identify the contents.

#### ***Allowable Subject Matter***

Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

Art Unit: 3727

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
